

STEELFLEX ROUNDSLINGS

**THE STEEL SLING
WITH THE FABRIC FEEL**
(Patent Pending)

GAC-EN60

**400° F Temperature Rating
NO Wire Rope Backup Needed
Core Inspection Window Standard**

Designed for Suspension Applications where metal slings are required.

With the trend in stage rigging to require metal slings for all overhead suspension, the problem has been how to accomplish this in the most efficient and cost effective way. *STEELFLEX ROUNDSLINGS* are the answer to that problem!

The load-bearing member of *STEELFLEX ROUNDSLINGS* is made from steel Galvanized Aircraft Cable wound in an endless configuration. This wire core is encased in a double-wall, polyester jacket. A unique inspection window allows for easy inspection of the core for broken wires and corrosion. The result is a highly flexible, easy to use sling that complies with all of the current rigging codes.

The benefits are many:

Increased Safety

- Improved cut resistance
- Higher heat resistance
- Conforms to load to grip securely
- Window allows complete core inspection

Saves Time

- No backup rigging required
- Fewer components to inventory and carry
- Superior flexibility makes rigging easy
- Tan colored Tuff-Tag confirms steel core

Saves Money

- Gives you the slings you want to use (roundslings), without having to buy the slings you would be required to use (wire rope or chain)
- Lowers show to show freight costs

Inspection Window

Capacities

Vertical	5,300 lbs.
Choker	4,200 lbs.
Basket	10,200 lbs.

Weight	3/4 lbs./ft.
Jacket Color	Black
