

Atlanta Rigging Systems offers wire rope slings manufactured by Lift-All company. All steel slings are built using heavy duty thimble eyes and Flemish splices. Slings are manufactured with the Lift-All *Tuff-Tag* which includes capacity, size and serial numbered identification. 3/8" and 1/2" diameter slings in stock and ready to ship.

Note: Slings must be inspected regularly. Remove slings from service if any of the following are visible:

Ten broken wires in one rope lay OR five broken wires in one strand in one rope lay

Wear or other loss of one-third of the original diameter of the individual wires.

Evidence of heat damage or corrosion of rope (internal and external) or attachments.

Kinking, crushing, bird caging, or any other damage resulting in distortion of the rope structure.

End attachments, including hooks, that are cracked, deformed, or obviously worn.

DO NOT inspect a sling by passing bare hands over the wire rope.

Never use a wire core wire rope (IWRC) in temperatures greater than 400 degrees F.
